PROCEEDINGS OF THE 8th INTERNATIONAL CONGRESS OF CHEMOTHERAPY

Athens, 1973

Edited by George K. Daikos,
with the editorial assistance of D.N. Papanastassiou

These Proceedings, entitled PROGRESS IN CHEMOTHERAPY, are published in three volumes: Antibacterial; Antiviral; Antineoplastic.

They form a permanent record of material discussed at the 8th International Congress of Chemotherapy, and present all the facts about antimicrobial agents and chemotherapy. This three volume set is a complete record of current research throughout the world. It should be available to every student, and every investigator with an interest in antimicrobial agents, or the control of infectious diseases.

Papers from a wide variety of professions, ranging from basic research, upon which continued progress in chemotherapy rests, to clinical medicine, and the practical application of antimicrobial agents, comprise the contents. The complete set costs $68.00.
